

CARBON FOOTPRINT REPORT

ONE-TDR34-34

Total lifecycle emissions

59.60 kg CO₂e / product

Emission sources of product lifecycle

The emission calculations of this report are made in accordance with the Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting standard. The purpose of the calculations is to determine the climate impact of the product lifecycle, i.e. greenhouse gas emissions. The carbon dioxide equivalent (CO₂e) that combines the greenhouse gas emissions, is used as a calculation unit.
